PROJECTS

Financial RAG Copilot

- Built a Retrieval-Augmented Generation system that chunks the dataset and stores each chunk's embedding (generated via SentenceTransformers) in a FAISS index, retrieves the most relevant chunks by comparing them to the embedded user question, and uses a local LLM (Llama 3.2) to generate the answer.
- Implemented semantic search, local LLM inference, and token tracking to evaluate speed accuracy tradeoffs in AI systems.

Cocktail Web App

- Developed a responsive web application, built with React, HTML, CSS, and JavaScript.
- Integrated a cocktail REST API, allowing users to search and access detailed cocktail information.

JobFinder Web App

- Built a fully responsive web app with React, JavaScript, Tailwind, and reusable components.
- Allowing user to search, filter, and apply to detailed job openings.
